Dear Mr. Brown, per our phone conversation of last week concerning reimbursement for work done on the Killion Ditch,

The last of October this year I hired BLS Contractors and along with my equipment we completed some work on the Killion ditch. I paid the contractor \$1000 for his part of the work. Although this work was done without prior approval from you, I believe it was necessary and would appreciate reimbursement. Following is a description and location of work done.

Commencing 60 feet South of the Ashboro road bridge over Killion ditch for a length of 90 feet the bank or east side had slid off into the bottom the ditch causing blockage and erosion on west side. We cleaned the bottom and reshaped the east side of ditch.

Commencing 390 feet North of the Ashboro road bridge over Killion ditch for a length of 750 feet there was Willow trees, trash and trees in the ditch. The field tile draining into the ditch were below the bottom of the ditch. We cleaned out the ditch, lowered the bottom by one and one half foot and reshaped the sides. I reseeded the ditch banks but because of the dry weather they haven't grown well. I will try again next spring. You are welcome to inspect our work. The piles of trees and brush removed have not been burnt yet because of the burn ban.

Thank You for your consideration

Ken Killion
